

UK MANUFACTURED

T3 is the perfect modular display system, providing unbeatable flexibility and stability using just a few cleverly designed elements. The key components are an aluminium beam and a connector that join together with a simple patented 'twist & lock' action, so no tools are required.

**TWIST & LOCK
IT'S THAT SIMPLE**

- ❑ Create virtually any structure
- ❑ Include doors, curves, lightboxes and shelves
- ❑ Quick and easy to work with
- ❑ Load bearing and very stable

T3 Airframe creates the look and feel of a bespoke display whilst avoiding many of the transport, time and labour costs associated with conventional construction methods. No other seamless modular system can compete on speed of build, versatility and ease of use.

Flexible – Endless possibilities exist for all your display needs: exhibitions, retail environments, reception areas, award ceremonies, road shows, studio backdrops and promotional areas.

T3 Fabframe has been specifically designed to take advantage of the developments in textile printing technology, so now you can dress your T3 stand with high impact fabric graphics. T3 Fabframe offers unrivalled flexibility and speed of build.

Dynamic – Create large backlit structures, lightboxes and illuminated walls that can be easily installed and transported.

T3 Shell Kit has been designed to transform shell-scheme stands into dynamic display environments. Using the specially designed clamp, T3 beams are easily fitted to the shell scheme walls to create an extremely strong and rigid framework.

Cost effective – Provides a value for money method of enhancing a shell-scheme stand and can become part of a larger stand-alone display in the future.
